Subject: FW: prior art flag

I figured out what I did wrong. The 10/825,593 should be non responsive amendment and there should be red folder with the correct action. I also created another 10/825,593 nonfinal when it should have been 10/506,395. I have the correct printout so I'm going to replace the red folder for the nonfinal and place it in your basket James. I'm not sure if you still have the non responsive red folder so I'll also create another one and put it in your basket.

Thanks,

Mike Pak

Hi James,

This application was intended to be a non-responsive amendment. Is the count sheet incorrect?

Please lifted prior art flag for 10825593 so that the case will count.
